Sourcing and Transformation are critical functions in a sustainable supply chain. One of the key aspects of green and sustainable supply chain is the use of green procurement practices (Varnas et al., 2009, Bala et al., 2008, Johnson et al., 2008, Dawson and Probert, 2007, Handfield et al., 1997). The idea is that the focal company in the supply chain will force its upstream suppliers to adopt and adapt technology and practices that result in more efficiently and environmentally friendly ...
