Other programming technologies depend upon SQL and PL/SQL to interact with the Oracle Database server.

## Oracle Database Online Documentation 11g Release 2 (11.2)

Application design includes database concerns such as interfacing SQL with traditional programming languages and the type of SQL to use. But every aspect of program coding will affect the usability and effectiveness of the application. Furthermore, each application program must be designed to ensure the integrity of the data it modifies - and that means understanding transaction integrity and the concept of "unit of work" and appropriate COMMIT logic.

## The DBA's Guide to Application Development - Database ...

SQL interacts with the backend database of web application. It is the "de facto standard" database language, always used in conjunction with another programming language. SQL programs are implemented as a way for businesses and organizations to access and manipulate information stored in their databases.
