Artificial Life: An Overview (Complex Adaptive Systems ...

Artificial life is a field of study wherein researchers examine systems related to natural life, its processes, and its evolution, through the use of simulations with computer models, robotics, and biochemistry. The discipline was named by Christopher Langton, an American theoretical biologist, in 1986. In 1987 Langton organized the first conference on the field, in Los Alamos, New Mexico. There are three main kinds of alife, named for their approaches: soft, from software; hard, from hardware;

Artificial life - Wikipedia

Artificial Life 13 was a conference held from July 19-22, 2012 in East Lansing, MI, on the campus of Michigan State University and hosted by the NSF-funded BEACON Center.
