Statistics and Probability Problems with Solutions sample 3. More Problems on probability and statistics are presented. The answers to these problems are at the bottom of the page. problems included are about: probabilities, mutually exclusive events and addition formula of probability, combinations, binomial distributions, normal distributions, reading charts.

Statistics and Probability Problems with Solutions - sample 3

Solution: Mean = $(1 \times 3 + 2 \times 5 + 3 \times 8 + 4 \times 4) / 20 = 2.65$. MEDIAN: Median signifies the central value or the middle value in a sorted list of numbers. To calculate median, the data has to be sorted in ascending or descending order. Example 3: Find the median of the set = { 2,4,4,3,8,67,23 } Solution: As we can see the list is not arranged in any order. The sorted list in ascending order = {2,3,4,4,8,23,67}.
