In the first edition of my own textbook (Futuyma 1979), I noted that "some characteristics, to be sure, do not respond greatly to artificial selection," but I immediately brushed hesitation aside: "the ubiquity of genetic variation leads one to wonder whether its amount ever limits a population's rate of evolution or its ability to adapt to environmental changes" (p. 209). Genetic variation has been viewed as sufficient not only for immediate adaptation to altered selection, but also ...
