The purpose of this laboratory exercise is to give students the opportunity to use the basic knowledge and techniques (Gram stain, biochemical reactions, etc.) gained in a medical or allied health microbiology laboratory in a series of practical, "hands-on" simulated patient scenarios. Three case studies will test students' knowledge of the pathogens of the gastrointestinal, respiratory, and urogenital tracts.

ASMscience | Medical Microbiology Laboratory Case Studies

Case studies are edited to match the appropriate symptomatology that would be associated with each microbe, and patient details are altered from case to case to make each patient distinct. Each student is assigned a number (1-5) that corresponded to the unknown microbe. A faculty member needs to provide all of the assignment documents to the students.
