Construction Surveying and Layout, Third Edition ...

3-D laser scanners are the most expensive and technically sophisticated surveying tools. Imagine using a conventional total station or theodolite to layout 10 or 15 points for a project. Now imagine setting up a 3-D laser scanner, which looks very much like a robotic total station, and recording a million points in a few minutes.

Surveying and Layout Work| Concrete Construction Magazine

Landmark surveys helped me when building a new house, they did a septic layout, property survey, foundation location and final survey. I dealt with other surveying companies that promised to come out but never showed up or gave me excuse after excuse. This was an overwhelming process for me, since I am not a builder.

Land Surveyor | New Jersey | Landmark Surveys, LLC

Construction surveying is carried out before, during and sometimes after a construction project. The initial layout for the engineering and construction works is usually called construction staking. Measurements are done from reference control points which determine the location of the planned structure or improvements, vertical and horizontal positioning, dimensions, configuration, and to control the elevation of the new structures. During construction the surveyor will check in to the ...
