Content Design London: What is content design?

Content design isn't just a technique to help you produce better content — it's a new way of thinking about content. Content design is part writing, part UX and part accessibility. It helps you produce content based on real users needs. In this regard, content doesn't have to be a piece of text — it can be anything.

Content design: a great way to make user-centered content ...

To better ground these principles, it is helpful to see content design as an ecosystem with 5 layers, each one building on top of the other. It begins with content that is findable and culminates with content that is helpful. Without being findable, clear, connected, and human, content cannot be truly helpful.
