Arc 1960 - Geodetic Parameter Database

The Global Positioning System uses the World Geodetic System (WGS84) as its reference coordinate system. It's made up of a reference ellipsoid, a standard coordinate system, altitude data, and a geoid. Similar to the North American Datum of 1983 (NAD83), it uses the Earth's center mass as the coordinate origin.

World Geodetic System (WGS84) - GIS Geography

The Struve Geodetic Arc is a chain of survey triangulations stretching from Hammerfest in Norway to the Black Sea, through ten countries and over 2,820 km, which yielded the first accurate measurement of a meridian.. The chain was established and used by the German-born Russian scientist Friedrich Georg Wilhelm von Struve in the years 1816 to 1855 to establish the exact size and shape of the ...
