Periodontal Treatment Protocol (PTP) for the General ...

A panel of experts convened by the American Dental Association (ADA) Council on Scientific Affairs presents an evidence-based clinical practice guideline and systematic review on nonsurgical treatment of patients with chronic periodontitis by means of scaling and root planing (SRP) with or without adjuncts. For patients with chronic periodontitis, SRP showed a moderate benefit, and the benefits were judged to outweigh potential adverse effects.

EBD: Nonsurgical Treatment of Chronic Periodontitis

One of these systematic reviews (Teughels et al 2020) conducted as a contribution to recent clinical guidelines for periodontal treatment included fewer studies (28) than this Cochrane review concluding “adjunctive use of systemic antimicrobials in periodontal therapy results in statistically significant benefits in clinical outcomes, with ...

Periodontitis: Systemic antimicrobials as an adjunct to ...

AAP treatment guidelines stress that periodontal health should be achieved in the least invasive and most cost-effective manner. This is often accomplished through non-surgical periodontal treatment. Non-surgical periodontal treatment does have its limitations. When it does not achieve periodontal health, surgery may be indicated to restore periodontal health.
