### Handbook Of Food Factory Design

Food manufacturing has evolved over the centuries from kitchen industries to modern, sophisticated production operations. A typical food factory includes the food processing and packaging lines, the buildings and exterior landscaping, and the utility-supply and waste-treatment facilities. As a single individual is unlikely to possess all the necessary skills required to facilitate the design, the task will undoubtedly be undertaken by an interdisciplinary team employing a holistic approach ...

Food Plant Design and Construction Most U.S. consumers are unaware that food safety begins with the design and construction of the plant that produces the food. And, if you've ever been a part of a food plant project team, you know how critical the facility design and engineering phase is to how the plant will ultimately operate.
