HD-TVI is a video signal processing and transport technology used to transmit video in HD security cameras and DVRs. HD-TVI is capable of transporting uncompressed high-definition video up to 500 meters with standard low cost 3C-2V coaxial cables using analog transmission techniques. RG59 Siamese coax cable is the most popular for security camera systems.

What is HD-TVI? - CCTV Camera Pros

With HD-TVI you can experience High Definition video without replacing cables or changing to IP. KEEP YOUR COAX and existing wiring infrastructure and enjoy a smooth and cost-effective transition to HD over coax with Speco's HD-TVI cameras, DVRs, Wall Mounts and Kits! Our full 1080p HD-TVI cameras are also available with Speco's industry renowned Intensifier ® technology.
