### **Mastering Lumion 3D by Ciro Cardoso - Books on Google Play**

Now, to get ready for Lumion 3D, what we need is a detailed 3D model. Lumion doesn't have any modeling tools; this means we have to pick a modeling package such as SketchUp, 3ds Max, Modo, or Blender, just to mention a few, and use a computer-aided design (CAD) plan as a reference to model the building. Modeling with one of these packages is out of the book's scope, but if you are modeling for the first time, you might want to explore SketchUp.

### **Mastering Lumion 3D - Packt**

Mastering Lumion 3D covers the process of picking a 3D model, preparing it, and then building layers on top of layers of detail, using textures and optimized 3D models. However, it doesn't stop there because several chapters are dedicated exclusively toward explaining how to use Lumion's effects and other special features to take your project to an expert level.

Lumion does an amazing job at giving the light, materials, and content we need to completely transform our ordinary 3D model into a professional architectural visualization. However, so far, Lumion cannot perform any miracles. It cannot pick a 3D model and make it amazingly gorgeous if there is a lack of detail.

### **Mastering Lumion 3D - Packt**

When we import the 3D model into Lumion, Lumion uses the origin axis as the point to place the 3D model. So, if the building is not close to this point, it is normal to see that when we place the 3D model in Lumion, the building is not at the point where we placed it. However, if we rotate the camera, we can see it.

There is a possibility to export simple animations from 3ds Max, but the animations we can import into Lumion are limited to move, rotate, and scale axes. In order to import these animations in Lumion we need to set the frame rate to 25 fps and export the animation as an FBX file. However, even after doing all this for the 3D model, we might find some issues that can be easily solved.
