## **Principle Of Agricultural Engineering**

Food engineering is a scientific, academic, and professional field that interprets and applies principles of engineering, science, and mathematics to food manufacturing and operations, including the processing, production, handling, storage, conservation, control, packaging and distribution of food products. Given its reliance on food science and broader engineering disciplines such as electrical, mechanical, civil, chemical, industrial and agricultural engineering, food engineering is considere

## **Food engineering - Wikipedia**

exploit this principle and to make it useful to agriculture. In research, a new kind of engineer—the engineer- scientist—is developing. He will link science and agriculture closer together. Agricultural engineers will have more concern with the overall farming oper- ations, not just the small components of particular machines, as now generally
