The Human City ponders the purpose of the city and investigates the factors that drive most urban development today. Armed with his own astute research, a deep-seated knowledge of urban history, and a sound grasp of economic, political, and social trends, Kotkin pokes holes in what he calls the "retro-urbanist" ideology and offers a refreshing case for dispersion centered on human values.

The Human City: Urbanism for the Rest of Us (2016) by Joel Kotkin is an interesting book where the author puts forward the idea that less dense cities of fewer than 10M people are the way many, if not most people want to live. Kotkin doesn't just assert this fact. He points out that most of the growth in population in the US has been suburban and exurban, even in the 2000s.

The Human City: Urbanism for the Rest of Us puts him once more into the fray. By way of full disclosure, I am generally sympathetic to Kotkin's positions, but have found his body of work to range from the insightful and thoughtful on one hand, to the simplistic and formulaic on the other. This book lands somewhere in the middle.
