Toad for Oracle 13.3 - Getting Started Guide

Toad uses the Oracle-provided DBMS_OUTPUT package, which contains functions for debugging PL/SQL code. When enabled, it uses a buffer that your PL/SQL code writes into and then a separate process queries the buffer out and displays the contents. When you are running debugging in the Editor and DBMS output is enabled, a DBMS Output tab automatically displays the results of DBMS_OUTPUT.PUT_LINE () statements in the Editor.
