Vauxhall Vectra Questions Lumpy Idle And Acceleration ...

Hi Paul, just reading your feeds.The vectra's are also known for their crankshaft sensors which are located on the bottom left side of the engine behind the manifold heat shield.this causes a lumpy tickover and loss of power also. ps,if your plug leads are sitting in a pool of oil as suggested before ,dont buy a cheap rocker cover gasket ,its false economy.

Vauxhall Vectra questions - lumpy idle and acceleration ...

Question type: Maintenance & repair Starts easy but when cold is very slow to pull away until revs build up. Main problem is when you are doing 50 -60 mp and revs are less than 1600 revs it's lumpy and you feel a lot of vibration. If you increase revs to 2000 it stops.

Vauxhall Vectra Questions Lumpy Idle And Acceleration

The smallest leakage can cause a lumpy idle and a standard compression check is useless. The key to accurately testing these is a cylinder leakage test. Posted on Apr 14, 2019 Helpful 0

SOLVED: My vauxhall vectra is running lumpy. It seems to ...

Hi, Your previous answers to questions asked have been very useful, especially the cleaning of gas divider and dismantlement of the vaporiser including the gas pressures. My car runs fine on petrol but is now lumpy on idle in the gas mode. It is a 1998 model with high mileage. I have checked the vaporiser and divider gas pressures which are ...

Vauxhall Vectra, rough idle on gas - Koltec VG392 fitted ...

Vectra 1.8 - Vectra 1.8 rough idle & temperature gauge cold. Hi, I have bought a Vauxhall Vectra 1.8 (2000) with a x18xe1 engine. Much of the time idling is very rough and occasionally the car stalls when idle. Lights will dim and RPM will jump around between 300 and 1200. Engine management light is on. Strong petrol smell when idle inside the car.

VAUXHALL VECTRA - Car Repair Questions Answered for Free ...

The car cranks fine, starts fine, but until the temp gauge hits the top blue line on the in-dash display it won't idle properly. If you try to pull away it stalls, but if you just sit there with the engine running for 5 mins it's perfect. If you try and give it a bit of gas the engine revs very lumpy, almost as

if it's only on 3 cylinders.
